Naples, FL- (January 8, 2019) – HealthLynked Corp. (OTCQB: HLYK) today announced the company has incorporated over 7,000 hospitals and acute care centers into its nationwide network.

Patient members have been able to LYNK directly to healthcare providers across the country to share and receive their medical information. Members can now LYNK to Hospitals and grant access to their medical records in case of a medical emergency.

Patients routinely visit emergency rooms without any medical records available to physicians to aid in their diagnosis and treatment. In addition to the lack of medical records, patients often arrive unconscious to the emergency room or unable to communicate due to any number of conditions, including strokes, heart attacks or auto accidents. When impaired patients are unable to communicate critical healthcare information, it can have a significant impact on their medical outcomes. The lack of medical information can lead to unnecessary testing, delays in treatment and misdiagnosis. Providing a way for patients to connect to the over 7,000 hospital facilities across the U.S. is an important part of our network services.

Dr. Michael Dent CEO stated, "Adding over 7,000 hospitals and acute care facilities strengthens the HealthLynked Network and our commitment to transform how medical information is delivered. We are excited about our growth as we continue to innovate and expand our services to both our patient members and network providers."

## **About HealthLynked Corp.**

HealthLynked Corp. provides a solution for both patient members and providers to improve healthcare through the efficient exchange of medical information. The HealthLynked Network is a cloud-based platform that allows members to connect with their healthcare providers and take more control of their healthcare. Members enter their medical information, including medications, allergies, past surgeries and personal health records, in one convenient online and secure location, free of charge.

Participating healthcare providers can connect with their current and future patients through the system. Other benefits to providers include the ability to utilize the HealthLynked marketing tools to connect with their active and inactive patients to improve patient retention, access more accurate and current patient information, provide more efficient online scheduling and to fill last minute cancelations using our "real time appointment scheduling" all within our mobile application. Healthcare providers pay a monthly fee to access these HealthLynked services.
